Programming Assignment 1

□ Write a program to extract terms from a document.
  ■ You have to do:
    □ Tokenization.
    □ Lowercasing everything.
    □ Stemming using Porter's algorithm.
    □ Stopword removal.
    □ Save the result as a txt file.

  ■ Text collection:
    □ One English news document (https://ceiba.ntu.edu.tw/course/35d27d/content/28.txt).

  ■ **Please zip and submit [1.]the result of document 1, [2.]the source code, and [3.]a report to TA.**
    □ 2 weeks to complete, that is **2021/10/18**.
